BAILEY METER COMPANY

Manufacture

Bailey Fluid Meter

Records and Integrates the flow of Steam, Water, Air and Gases at any capacity, pressure and temperature.

Bailey Boiler Meter

Recording Flow of Steam from Boiler, Flow of Air from Combustion and Temperature of Flue Gases leaving Boiler, all on one chart.

We also make several other types of meters for special work.

Several old Ohio State men are using these meters in their power plants and elsewhere, to increase their efficiency and save coal.

The purpose of this Ad is not to sell more meters, for we are already extremely busy with orders from the Government and many of the largest concerns of the country. What we do want now is some more good Mechanical Engineers to help us in our Engineering Department. The work consists first in assembling, testing, calibrating and inspecting meters in the shop. The program is then to send the more capable men out on installation, power plant testing, etc. Rapid advancement is offered to the right men.

We prefer men who have had at least one or two years experience in power plant work, but write us telling about yourself or even some friend whom you think might like the job, whether or not he has had such experience or even if he is not an Ohio State man.

BAILEY METER COMPANY
